

Race Suspension THE BOUNCE-FREE SOLUTION

At USWE we have discovered how to stop the “dancing monkeys” from going crazy on your back. We have designed a revolutionary 4-point suspension that these monkeys just can’t beat. It is bounce-free in action and we call it – No Dancing Monkey™ technology. All our race packs are equipped with the No Dancing Monkey™ technology, designed with 4-point suspension straps that reduces the pressure on your shoulders and allows full body movement and breathing capacity. With the pack secured on your back with zero bouncing, providing outstanding form-fit, you can focus on your performance and enjoy the ride.

THE EDGE

It's 100 bounce free. Provides the super fit on individual level. After only a few minutes you'll forget that you're wearing it.

FEATURES

- Patented technology
- 4-point suspension harness
- Chest straps: allows tight fit and chest expansion (breathing)
- Shoulder straps: better fit and reduced pressure on shoulders
- Velcro straps make size adjustment easy and fast
- Multi-size loops for extra wide size range
