Vortex Aluminum Sprocket & Handlebar

MX/SX/Flat Track Bars & Pads

V3 Handlebars

Vortex redefines strength with its V3 OS Handlebar with crossbar for MX and SX. The OS bar is 29% stronger than the standard oversize bar. You can ride with confidence knowing that Vortex has put years of research, development and testing into these super strong bars. Vortex offers the standard 7/8 bars in the same bends as the OS bar and a full line of Flat Track bars.

SPROCKETS

Aluminum & Steel

Standard

The Standard in the race industry. AMA Superbike and Moto-cross riders trust the proven design of the Standard Vortex Aluminum Sprocket because of its tight tolerances and unique tooth design. **Note: We make custom oversize sprockets up to 65 teeth in Silver.**

F5

The F5 PTE Hardcoat is built for endurance. Hard anodized aerospace aluminum with a jet black dye. The result is our ultra-light F5 sprocket that stays cleaner and lasts longer.

Steel

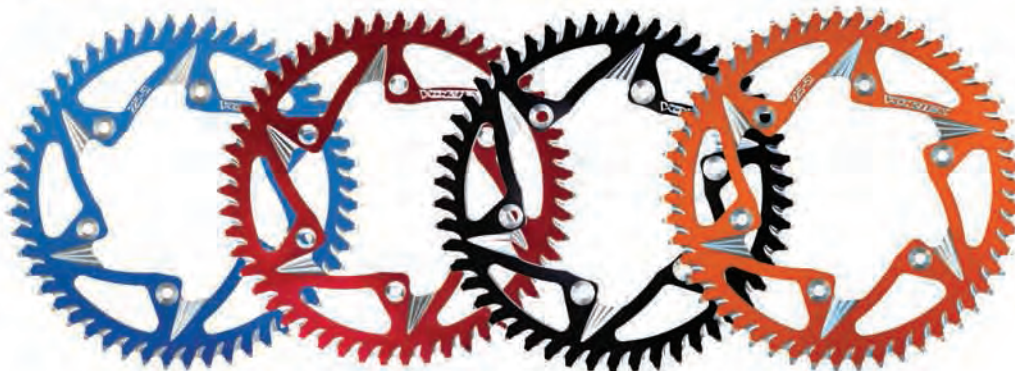

The perfect balance of weight, strength & style. Vortex Steel Sprockets are comprised of carbon steel and are electro-plated satin black to resist corrosion. Hardened teeth ensure that the sprocket will hold up to many miles without affecting its strength. The street sprockets are also cupped down from the tooth ring to the body to reduce as much weight as possible.

Front

The perfect complement to Vortex Rear Sprockets. Our precision-manufactured Vortex Front Sprockets are induction-hardened to very specific tolerances in order to improve concentricity providing a stronger, quieter and longer lasting sprocket. Vortex Front Sprockets are plated with a special zinc coating to resist corrosion with drilled lightening holes to reduce rotating mass.

Custom CAT5 Series

Available in October only.

The Vortex CAT5 Series Sprockets are unlike any other.

We utilize the same proven Vortex design with color anodizing that excludes our sweeps, mud grooves and teeth. The result is a flash of color **RED**, **BLUE**, **BLACK** and **KTM ORANGE** with silver highlights. In the month of October, Vortex makes a **PINK** CAT 5 Sprocket in support of Breast Cancer Research and donates 25% of net sales to breast cancer charities. The CAT 5 Series is our only custom sprocket and are made to order.

Vortex Sprockets consistently
make it to the podium on the
national stage.

Chain & Sprocket Kits

The Vortex Performance Kit takes the guess work out. Each kit comes with the correct length of chain and pre determined gearing for the application. Each kit includes a black V3 Vortex Chain, Vortex Front Spkt, and Vortex Rear Spkt (Rear Spkts available in aluminum or laser cut steel).

Street Steel Kits

HFRS - Hyper Fast - 520 conv., steel laser cut rear spkt, gearing 1 down in front, 2 up in rear, SV3 or RV3 chain
GFRS - GoFast - 520 conv., steel laser cut rear spkt, gearing 1 down in front, stock rear, SV3 or RV3 chain
WSS - Warranty kit - stock gearing with laser cut rear spkt, SV3 or RV3 chain

Street Aluminum Kits

HFRA - Hyper Fast - 520 conv., hardcoat aluminum rear spkt, gearing 1 down in front, 2 up in rear, SV3 or RV3 chain
GFRA - GoFast - 520 conv., hardcoat aluminum rear spkt, gearing 1 down in front, stock rear, SV3 or RV3 chain
SSA - Super Street kit - stock gearing with hardcoat aluminum rear spkt, SV3 or RV3 chain.

Motocross Steel Kits

MXS - GoFast - steel laser cut rear spkt, gearing stock front and 1 up in rear. MV3 Vortex chain.

Motocross Aluminum Kits

MXA - GoFast - hardcoat aluminum rear spkt, gearing stock front and 1 up in rear. MV3 Vortex chain.

Chain

Vortex Performance Links Roller Chains utilize the highest technology available. Race tested by top professional racers in extreme conditions, these chains are proven to last.

MV3

At only 3.6 lbs per 120 links, the MV3 is one of the lightest chains on the market without sacrificing strength or durability. Thanks to Vortex's elite heat treatment process and heavy duty construction, the MV3 chain has a tensile strength of 9000 lbs.

SV3

The Vortex SV3 series is a street use chain that utilizes our unique Duo-Glide seal design that provides two pockets of lubrication per side. This allows the SV3 chain to operate under the harshest of conditions for extensive periods of time. Ultimately, Vortex's Duo-Glide seal design reduces heat and friction resulting in a longer wear life than a standard O-ring chain. The SV3 chain utilizes solid rollers for unmatched performance and durability.

RV3

The Vortex RV3 is the ultimate in high performance sportbike racing chain. Engineered for the extreme demands associated with sport bike racing today. Tri-Glide seal provides three pockets of lubrication per side and two stabilizers, ultimately reducing heat, friction, and increasing wear life by 10 times over standard O-ring chains. The RV3 chain utilizes solid rollers for unmatched performance and durability. The RV3's unsurpassed seal technology and tensile strength makes it the leader in sport bike racing chain and the clear choice of champions.

We also carry RK gold MXZ, MXU, and EXW chains.

The Original

There is nothing like the Original! The Original Vortex Rear Set is CNC-machined from solid billet aluminum to be lighter and stronger than stock. Our specially designed Race Grip Footpegs offer traction for the most rigorous of circumstances. Most importantly, the Original Vortex Rear Set also offers wide range of adjustability and dual roller bearings in each lever allow for ultra precise shifting and braking.

The New Standard

Vortex's New Standard Rear Set is the new standard in racing components. CNC-machined from solid billet aluminum to not only be lighter and stronger than stock, but also to have a strong emphasis on bike preservation.

The New Standard Rear Sets boast Vortex's trusted Race Grip Footpegs, which offer superior traction; a wide range of adjustability; and dual roller bearings for ultra precise shifting and braking. The New Standard Rear Sets also have molded, intuitive rubber folding toe pegs, and independently-mounted levers to help prevent binding in the event of a crash. This new, patented design raises the bar - not the price - in quality and safety.

- Coarse thread enables quick closure without cross-threading
- Large, contoured finger tabs allow for easier opening compared to classic Vortex design
- Safety lock switch prevents accidental cap loosening due to vibration or contact
- Integrated dual check valve assembly eliminates fuel tank pressure issues
- Vent and chamber design helps stop leaks by containing any fuel that gets past the check valve
- Up to 50% lighter than stock keyed fuel tank caps
- Customize to match your bike with interchangeable, colored safety lock switches.
* Comes standard with silver lock switch.
- Patents pending USA and EU.

CASE COVERS

Vortex Case Covers are CNC-machined from solid billet, offering the highest level of crash protection. Increasingly mandated by race organizations, Vortex Case Covers are not only tough, but add increased safety as well; keeping vital engine oil from spilling in a crash. Anodized Black for corrosion resistance and an attractive appearance.

0 DEGREE CLIP-ONS

7 DEGREE CLIP-ONS

Vortex Clip-Ons are an economical replacement handlebar with amazing strength. They are machined from solid billet with a removable handlebar. In the event of a crash, you simply replace the handlebar tube instead of the entire Clip-on. Vortex handlebars come in 0 and 7 degree angles. Kits include both collars, two handlebar tubes with plastic ends and high tensile strength fasteners.

Note: Vortex Bar End BE118K will also work with Vortex Clip-on tubes. Available in Silver and Black.

Vortex Clip-Ons are for race use only. On certain motorcycle models modification of the surrounding components may be required. Clip-on size is determined by measuring the diameter of the fork tube where the clip-on will be installed. For the most accurate measurement, always use calipers to measure the fork tubes. Do not attempt to install Vortex Clip-ons over any part of a fork tube that is tapered.

Since Vortex Clip-ons have different geometry than stock parts, interference with other components may occur. Once the installation is complete, it is critical that the user checks for any possible interference over the **FULL RANGE** of steering movement prior to riding the motorcycle.

FAIRING BRACKETS

Vortex proudly stocks race fairing brackets and OEM replacement fairing brackets. The race brackets are super light weight with no headlight mounting points. The Vortex OEM brackets are a direct replacement of the OEM brackets at a fraction of the cost. All OEM components - bodywork, mirrors, guages, headlight, etc. mount to the Vortex OEM bracket like stock.

OE Replacement work with all stock components

Race Use Only - no headlight mount

Lever Guards

Mandated by most race organizations, the Vortex V3 Lever Guard is adjustable to three positions. The guard includes three M5 x 12 FHCS. Only two are required for installation. Use a thread locking agent on screws and check for tightness after each ride. The V3 Lever Guard is meant for race use only. Bar end must have an .875 inch diameter to work with this part.
