

You must install Puck Caps with provided "O" rings. Kit comes complete with Puck Caps, Pucks, "O" rings, washers and bolts as shown. ("O" ring not pictured.)

IMPORTANT: Washers will fit VERY snugly into Puck. Be sure that Washers are installed level as an unlevel installation can cause damage to the Puck. Use anti-seize grease on all bolts. Check bolts periodically for tightness. To be installed by a certified mechanic only. For race use only.
