

Step #1 Choose Base Kit

Bracket kits are not available for all models

Step #2 Choose Pucks (Qty 2 needed)

standard puck height 2.125 inches

shorty puck height 1.375 inches

Shorty pucks will out perform standard pucks in high speed crashes where frame and engine damage is more likely to occur, but offer less fairing protection in slow speed crashes.

When it comes to quality motorcycle frame & body, Vortex is the brand you can depend on.
