- ✓ Covering 245 reman SKU's due to consolidations resulting in less inventory and more sales
- ✓ Covering 93% of market sales volume
- ✓ Continuously expanding coverage

WAIglobal

ENGINEERED ACCURACY

Precision Engineered ignition modules and plugs ensure proper performance plus precise connection (where applicable)

Precision Machined bodies assure correct fit and accurate mount locations

Precision Machined and ground shafts assure high speed accuracy and prevent bearing failures

100% New Components and fasteners eliminate premature failures

OE Equivalent high voltage ignition coils

Competitor's Unit

Complete "ready to install" including cap, rotor, coils, modules + wire harness (where required)

Competitor's Gears

May be inferior to OE in hardness and cause excessive wear or engine damage

Assures customer satisfaction with OE equivalent gears with correct hardness (HRC 18-26)
