

FOR IMMEDIATE PRESS RELEASE

Wilwood GP310 MPR Brake Kits for Harleys & V-Twin Customs

Wilwood GP 310 four piston calipers with BP-10 "Smart Pads" and the new MPR Mirror Polished Stainless Steel Rotors combine pure stopping power and show winning style for the popular Softail, Dyna, and Touring model Harley-Davidsons since 1984.

GP310 front calipers mount directly in the factory caliper location. Rear calipers require a mount bracket kit for each model series. All calipers feature stainless steel pistons, high temperature seals, anti-rattle pad clips, and are available in chrome, polished, black, red and other custom Wilwood colors.

Wilwood "Smart Pads" increases stopping performance and offer the lowest noise and dust levels available.

MPR rotors replace factory 11.50" diameter discs. Both the MPR rotors and the GP310 calipers can be used independently in conjunction with the original factory components.
