# REAL-TIME PAINT, HEADLAMP AND WINDOW TINT PATTERN DELIVERY

### Up To The Minute Availability

As XPEL's teams of product engineers work daily to create design templates for new vehicles, these products are immediately available in the software the instant they are completed. No waiting for update packages to be sent out or downloads to complete. Just use the convenient search interface in the software and every pattern, new and old, is available in real time as soon as they are available.

### Variable Geometry

Having the pattern you need when you need it is just one part of the equation. To ensure total customer satisfaction regardless of their budget or expectations, you need a cutting program with serious flexibility.

With our patented Variable Geometry functionality, you can safely and quickly implement practically any variation of coverage detail to ensure your customers get the quality they expect at a price they can afford. Wrap any edge, change the amount of coverage or even the design elements of a pattern without the possibility of accidentally making changes that would leave the part unusable.

### Retail And Dealer Sales Sheets

With so many coverage options available, sometimes a good explanation simply isn't enough to convey what to expect to your customers. XPEL's Design Access Program allows you to produce printable comparative visual aids for your customers so they can truly see what their options are.

### Precision Patterns

Having a software package with lots of bells and whistles is nice, but let's face it...what really makes the difference in one program over another is the quality of the designs.

Of course precise edge alignment and correctly positioned holes for features such as parking sensors, emblems, air inlets, headlamp washers and fog lamps is incredibly important. But even more important is the amount of stretch and contortion required to ensure this alignment.

The more a paint protection film must be manipulated to get it installed onto the car, the more you will see distortions in the surface of the finished product. At XPEL, our two primary design objectives are to allow the film to lay as naturally

Having a software package with lots of bells and whistles is nice, but let's face it...what really makes the difference in one program over another is the quality of the designs.

on the car as possible to avoid unnecessary stretch and contortion, and to ensure perfect alignment with the body panels.

In addition to these two primary objectives, our design team is also committed to providing designs that employ absolutely no unnecessary seams or reliefs. And, if a seam is needed to navigate a particularly complex part, our designers will do everything possible to hide it on a bodyline or on some part of the panel that is out of sight.

## XPEL ULTIMATE ISN'T A CONVENTIONAL PAINT PROTECTION FILM.

# ULTIMATE

SELF HEALING PROTECTIVE FILM

Conventional paint protection films can show scars and yellowing after a single year of use—especially in the real world, where most of us drive every day.

Constructed from a combination of advanced elastomeric polymers, XPEL ULTIMATE's special clear coat not only prevents the film from discoloring due to contamination and ultra-violet radiation, but also heals itself from swirl marks and light scratches that can occur through ordinary washing and drying or daily driving.

Contaminants like bug splatter, bird droppings, sap and road tar wipe off XPEL ULTIMATE's super-slick surface with a cloth, while scuffs and light scratches in the surface of the film disappear within minutes in the heat of the sun or the warmth of your garage—leaving your car pristine and the protective film like new.

And this level of protection comes without compromise. The mirror smooth finish of XPEL ULTIMATE ensures that no unwanted texture, commonly referred to as “orange-peel,” is added to the appearance of your car, leaving the protected surface indistinguishable from the factory paint. Professional installation by one of our network of factory trained installers ensures exact alignment around surface features such as air inlets, parking sensors, headlamp washers and other design elements, while the film along the perimeter of each panel is wrapped around the edges for a truly invisible barrier against the hazards awaiting you on the road.

Even the film's adhesive is superior. The enhanced workability of XPEL's adhesive allows the film to be contoured around the most complex

surfaces without distortion—which means you show off a perfect finish, not seams, wrinkles, and ripples. XPEL ULTIMATE also comes with a full 10-year warranty against yellowing, discoloration, peeling, cracking and hazing. If it fails, we'll replace it—labor included

You drive one of the finest cars in the world. Protect it with finest paint protection film available on the market.

# YOU CHOSE A MATTE PAINT FINISH TO BE DIFFERENT. NOW PROTECT YOUR DECISION WITH XPEL STEALTH

# STEALTH

MATTE FINISH PAINT PROTECTION FILM

Built with the same elite self-healing and protective features as our XPEL ULTIMATE film, XPEL STEALTH comes in a satin finish that preserves matte paint in its showroom condition. Matte finishes are notoriously difficult to maintain and even harder to repair—even something as simple as touching up a rock chip. XPEL STEALTH not only prevents damage from road debris and bug acids but enables you to easily wash and dry your car without fear of changing the luster of the finish. Keep it standing out for the right reasons with paint protection designed specifically for the job — XPEL STEALTH.

Matching the sheen of most factory matte paints, XPEL STEALTH

disappears once applied, making it a perfect choice for transitioning between vulnerable areas on the front of the car to unprotected top surfaces. And just like XPEL ULTIMATE, swirl marks and light scratches disappear in a matter of minutes in the sun or the warmth of your garage.

Looking for a reversible way to change your car's appearance—and protect it at the same time? XPEL STEALTH can transform glossy paint into a sleek satin finish, for thousands less than a custom paint shop would charge for a high-end matte finish. Drop your car off with one of our authorized installers and come out with what looks like a completely different car in a fraction of the time.

50' and Custom Length

## SOMETIMES YOU WANT NOTHING BETWEEN YOU AND YOUR CAR'S FINISH.

XPEL XTREME is the closest you can get without going "naked." XPEL's clearest and thinnest protective film, XPEL XTREME, offers the peace of mind that comes from a protective barrier that safeguards against environmental pollutants and road debris in an invisible package.

A perfect choice for showing off the classic curves and hand-applied paint on custom and vintage cars, XPEL XTREME goes on without any of the subtle texturing or "orange peel" that can come from other, lesser paint films. You see your car the way it was meant to be seen.

Formulated without XPEL's proprietary self-healing polymer top coat, XPEL XTREME can be configured to fit any application and budget. Bug splatter, bird droppings,

and other environmental pollutants wipe right off without affecting the paint. And if the film is damaged while protecting your car from a stone strike, simply replace the damaged segment with fresh material in a matter of minutes.

We back XPEL XTREME with one of the best warranties in the business. You're covered against yellowing, cracking, peeling or delamination for seven years. If our film fails, we'll not only replace it, but we will cover the cost to remove the old film and put the new one on.

Show off your car with confidence.

## SOMETIMES A TEMPORARY PROBLEM REQUIRES A MISSION-SPECIFIC SOLUTION.

With XPEL's TRACWRAP temporary protection film, you get a professional-quality barrier from rock chips, road debris, and bug splatter in an affordable, easy-to-install package.

Whether you're protecting a vintage race car during a track weekend or just taking a road trip, TRACWRAP offers elite protection that goes on in less than 45 minutes from a convenient, easy-to-carry roll. TRACWRAP comes in a variety of sizes to suit virtually any application—from a classic Ferrari to a Jeep tow vehicle to a vintage Harley-Davidson motorcycle—and it costs less than you'd spend repairing a single ding from a rock chip at your favorite body shop.

TRACWRAP is made from tough 8mil (0.008") urethane film—a

substantial barrier that offers far more protection than masking tape or messy-to-apply spray-on products. XPEL's air-channel adhesive lets anyone install TRACWRAP with no special tools or chemicals, and do it in real-world conditions in a parking lot, track paddock, or garage. The days of ruining a vehicle's classic lines with clumps of blue painter's tape—or, worst of all, going without any protection at all—are over.

And when you're finished with it, TRACWRAP peels easily off in less than five minutes with no hassle, no mess, and no sticky residue. No temporary wrap offers TRACWRAP's level of protection and ease of use, and it comes from the most trusted name in protective paint film—XPEL.

## RUGGED, THICK, STRONG PROTECTION WITH ARMOR

Sleek, invisible paint protection is great for that “normal” everyday ride. But sometimes work and play takes you places a lot more rugged than “normal.”

XPEL ARMOR provides the thickest, strongest protective barrier in the XPEL lineup—perfect for commercial, industrial, and off-road vehicles. Defend against scrapes, scratches, scuffs, gravel strikes, and other hazards with protection you can see—and feel.

XPEL ARMOR’s substantial, pebbled polymer film looks and performs like spray-on bed liner, but at a fraction of the cost. XPEL ARMOR is 30 percent thicker than conventional films, and designed to resist abrasions and punctures from even the most rugged use.

Applied to kick plates, bumpers, rocker panels, tailgate areas or other

high-wear locations, XPEL ARMOR is designed to take a beating and still look great. It also doesn’t require any special care after installation. Dirt, grease, tar and other contaminants hose right off.

Looking for something to enhance an “experienced” vehicle that already has some road rash or other paint damage? XPEL ARMOR covers those areas and provides both protection from new damage and a unified look with the surrounding undamaged areas.

And even though XPEL ARMOR will be going with you into the toughest conditions, you’re still covered by the one of the best warranties in the business—seven years against cracking, peeling, or discoloration.

It’s time to get dirty.

# IT'S THE FINEST WINDOW FILM AVAILABLE AT ANY PRICE, AND IS GUARANTEED FOR THE LIFE OF THE CAR.

Traditional window films try to do two jobs—block heat and look cool—and usually don't do either of them well. XPEL PRIME XR gives you all the heat and UV protection benefits of window tint, but without the super dark look that can make it hard to see out of the car—or get you a ticket in some locations.

XPEL PRIME XR's patented Nano-Ceramic particle formulation blocks 99 percent of the sun's UV rays and more than 80 percent of its heat and infrared radiation—all without the metallic ingredients other films use that can disrupt radio, cellular and Bluetooth usage inside your car.

## OUR CUTTING-EDGE TECHNOLOGY MAKES A GREAT CAR EVEN BETTER

### Ceramic Particle Technology

XPEL PRIME XR contains ceramic particles that filter out the sun's infrared radiation — making them more effective than traditional metallized or dyed films.

### Superior Heat Rejection

Our ceramic particle technology blocks the vast majority of the sun's heat-causing infrared radiation — keeping your interior cool and improving fuel efficiency.

### Uv Ray Protection

XPEL PRIMETM XR provides SPF 1,000 protection that effectively blocks over 99% of harmful UV rays that can lead to numerous skin cancers, premature aging and skin cell damage.

### Greater Clarity

In the past, keeping cool meant darker shades. The ceramic technology in XPEL PRIME XR allows us to provide the highest performance without sacrificing clarity and color.

# PRIME XR

## SHADES AND VLT'S AVAILABLE:

### Charcoal:

5, 20, 35, 50, 70

### Black:

5, 20, 35, 45, 55, 70

### Blue:

60, 70, 80

### Crystal Clear Signal

Our Nano-Ceramic particle technology does not interfere with radio, cellular, and Bluetooth signals like traditional metallized films.

## OUR INNOVATIVE HYBRID FILM TECHNOLOGY IS A STEP ABOVE THE REST.

**PRIME**HP

XPEL PRIME HP not only looks cool — it feels cool. Our films were designed with first-class heat rejection technology to keep you comfortable and protected.

### MOVE BEYOND THE ORDINARY

#### Hybrid Dye-Metal Construction

XPEL PRIME HP offers higher heat rejection compared to traditional dyed films with a slightly more reflective finish.

#### UV Ray Protection

XPEL PRIME HP provides SPF 1,000 protection that effectively blocks over 99% of harmful UV rays that can lead to numerous skin cancers, premature aging and skin cell damage.

#### Crystal Clear Signal

Although our XPEL PRIME HP contains a metalized layer, we have specifically

formulated our hybrid construction so it does not interfere with radio, cellular, or Bluetooth signals.

#### Looks Good

The black color of our XPEL PRIME HP series provides a great match to OEM privacy glass and remains the same over the years.

#### Blend of Performance and Value

XPEL PRIME HP series is a perfect marriage of value and performance.

### SHADES AND VLT'S AVAILABLE:

#### Black:

5, 20, 35, 50

## **COST AFFORDABLE, HIGH PERFORMANCE COLOR STABLE WINDOW FILM**

When protection from heat isn't as big a priority, XPEL PRIME CS is an ideal choice. Like XPEL PRIME XR, it blocks 99 percent of the sun's damaging UV rays, and it provides a lifetime of color-stable, glare-blocking performance. It will never fade, crack, peel or turn purple like many lesser protection films often do. XPEL PRIME CS's neutral charcoal finish looks great on any car, and like XPEL PRIME XR, it has a lifetime transferrable warranty.

### **ADD PROTECTION AND COMFORT TO YOUR VEHICLE**

#### **REDUCES GLARE**

Our cutting-edge technology decreases the glare caused by infrared and UV rays before it reaches your eyes — enhancing visibility and reducing eyestrain

#### **KEEPS YOU COMFORTABLE**

XPEL PRIME CS window films block solar heat radiation to keep your vehicle at a comfortable temperature and improve fuel efficiency.

#### **UV RAY PROTECTION**

XPEL PRIME CS provides SPF 1,000 protection that effectively blocks over 99% of harmful UV rays that can lead to numerous skin cancers, premature aging and skin cell damage.

#### **CRYSTAL CLEAR SIGNAL**

XPEL PRIME CS contains no metalized particles ensuring that it does not interfere with radio, cellular, or Bluetooth signals.

## **PRIMECS**

### **SHADES AND VLT'S AVAILABLE:**

#### **Charcoal:**

5, 20, 35, 50

#### **Black:**

5, 15, 20, 30, 35, 50, 70

#### **LOOKS GOOD**

The black or neutral charcoal color in our XPEL PRIME CS window films remains the same over the years and never fades or turns purple.

# XPEL PAINT PROTECTION FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

**Black Smoothee Squeegee**

**B204** - The 4" Black Smoothee blade is a great initial prep tool for cleaning your glass before the install. This tool also does a fine job on those paint protection installation projects that you have.

**18" Green Turbo Squeegee**

**A2218G** - This soft squeegee provides the same level of flexibility as the black rubber squeegee, but is made of a slippery plastic that glides easier over most paint protection films. Comes in 18 inch strips only.

**4" White Squeegee**

**H9907W** - Headlamp film installation squeegee

**30"x58" Absorbent Mats with XPEL logo**

**R1341** - Perfect for Paint Protection Film installation to keep the installation area dry, or for use with our XPEL Rinse Free Car Wash to prevent excess moisture from dripping onto the floor.

**Dirt Pic**

**A8001** - Pick out the trash without trashing the paint! Get the Dirt Pic to quickly and easily remove foreign objects and particles from fresh wet paint.

**XPEL LED Install Light**

**M4073** - LED work light with hard case for protection.

## KNIVES, BLADES & ACCESSORIES

### Olfa Razor Knife

**A1901** – Features a slide lock and pocket clip/blade snapper. (Uses standard size blades)

### Olfa Stainless Replacement Blades (50 pk)

**B129S** – This blade made from high quality steel is produced using OLFA's precise multi-step production process for unparalleled sharpness and superior edge retention. 50 blades per pack.

### Olfa Carbon Replacement Blades (50 pk)

**B129C** – Olfa Ultra Max ABB-50B Carbon snap blades for the Olfa Razor Knife. These blades are sharper than the stainless versions and are perfect for cutting XPEL Paint Protection Film.

### PPF Cutting Die 5/16" Base

- 13/64 cut edge - R1350
- 41/64 cut edge - R1351
- 45/64 cut edge - R1352
- 49/64 cut edge - R1353
- 53/64 cut edge - R1354
- 57/64 cut edge - R1355

Designed for cutting circles around factory parking sensors

## SPRAYERS & ACCESSORIES

32 Oz Spray Bottle & High Volume Trigger (Blue)

**Spray32-B** – Recently upgraded with high volume triggers, these are the best spray bottles to use for PPF installation.

32 Oz Spray Bottle & High Volume Trigger (Red)

**Spray32-R** – Recently upgraded with high volume triggers, these are the best spray bottles to use for PPF installation.

32 Oz Spray Bottle & High Volume Trigger (White)

**Spray32-G** – Recently upgraded with high volume triggers, these are the best spray bottles to use for PPF installation.

Pump Dispenser for XPEL Installation Gel

**XPF-Pump** – Pump Dispenser for XPEL Installation Gel

5 Gallon SS Pressurized Sprayer

**A1105** – This is a brand new 5 gallon tank.

# XPEL PAINT PROTECTION FILM INSTALL TOOLS

## LIQUIDS

XPEL Installation Gel 2.0 (16oz)

**R1340-16A** – Specially formulated for maximum maneuverability during installation, without the slippery feeling on your hands. Already premixed, there is no need to dilute the product.

XPEL Installation Gel 2.0 (1 Gal)

**R1340-128A** – Specially formulated for maximum maneuverability during installation, without the slippery feeling on your hands. Already premixed, there is no need to dilute the product.

XPEL Installation Gel 2.0 (5 Gal)

**R1340-640A** – Specially formulated for maximum maneuverability during installation, without the slippery feeling on your hands. Already premixed, there is no need to dilute the product.

PPF Surface Prep (8 oz can)

**PPF-Prep** – Designed to shave valuable time off of your paint protection installations. Working as an adhesive promoter, the Surface Prep gives you a variable adhesion level, allowing you to choose where you need a faster tack versus where you need a more forgiving adhesion.

XPEL PPF Surface Prep Marker

**PPF-Marker 12(pk)** – PPF Marker-12

Designed to shave valuable time off of your paint protection installations. Working as an adhesive promoter, the Surface Prep gives you a variable adhesion level, allowing you to choose where you need a faster tack versus where you need a more forgiving adhesion.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

Grip and Glide - Orange

**1991OR** - A replacement blade for the ergonomically designed Grip & Glide squeegee. A 'Flat Glass' squeegee that is increasing in popularity among professional installers. The Grip & Glide Orange is slightly harder than the Grip & Glide Yellow.

Blue Tri-Edge

**A101** - The TRI-EDGE BLUE has precision angles and is comfortable to grip, which will allow the user to reach those challenging areas while trying to achieve window tint perfection.

Yellow Tri-Edge

**A102** - The TRI-EDGE YELLOW has precision angles and is comfortable to grip, which will allow the user to reach those challenging areas while trying to achieve window tint perfection.

Orange Tri-Edge Plus

**A104** - The TRI-EDGE ORANGE has precision angles and is comfortable to grip, which will allow the user to reach those challenging areas while trying to achieve window tint perfection.

Unger Pro Handle

**A1400** - This rubber coated squeegee handle works with many different squeegee blade attachments: Clear Max, Blue Max, Unger soft black rubber squeegee & channel.

Unger ErgoTec Handle

**A1400E** - The Unger Ergo Tec Handle is designed for use with Unger metal channels, which then can be fitted with either Pro Replacement Blades for cleaning or Blue Max Inserts for film installation.

Fusion Handle 5"

**A1400F5** - The 5" Fusion Squeegee Handle is designed to easily accommodate squeegee blades such as the Orange Fusion 5" Blade, Blue Max, and Clear Max blades. Are you tired of bending, squeezing and forcing Blue Max blades into your Unger handles? Try out a 5" Fusion handle today.

Fusion Handle 8"

**A1400F8** - The 8" Fusion Squeegee Handle holds 8" squeegee blades and provides a larger surface area than the 5" Fusion Handle and 5" Blade, allowing you to push more water out with each stroke. The larger surface area allows you to finish your flat glass jobs quicker and with less effort.

Performax Handle

**A1400P** - The Performax Handle is a heavy duty squeegee handle that is designed to easily utilize thicker squeegee blades such as Blue Max, Clear Max and Orange Fusion. An extension is also easily fitted to the threaded handle.

5 Short Fusion Handle

**A1400SF5** - The 5" Short Fusion Squeegee Handle is made just a little shorter than the A1400F5 to better fit into the auto tinter's hand. These Fusion Handles are designed to easily accommodate squeegee blades such as the Orange Fusion 5" Blade, Blue Max, and Clear Max blades.

Equalizer Handle

**A1401** - The Equalizer Handle is designed to allow extra leverage and to save your hands from getting as tired when using the Equalizer Push Stick. The Equalizer Handle will not work with other brands of push sticks

Pro Blade W/Channel

6" - A1406      10" - A1410  
12" - A1412    18" - A1418

Pro Blade with metal channel for window cleaning is built to last. Great for initial prep work or slip the black blade out and put a Blue Max blade in and your ready to install!

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

**Grey 5-Way Tool**

**A1801** - The Grey 5-Way Tool is a cheap, but great window film trim guide. It is also a handy "Bump Tool" for bumping or drying the edges of your flat glass film. The Grey 5 Way is thicker and more flexible than either the White or the Black 5-way Tools.

**Black 5-Way Tool**

**A1802** - The Black 5-Way Tool is great as a trim guide or wrap it in a paper towel to use it as a "bump tool" to get water out. Much harder than the cheaper white 5 way tool, so it seems to last longer.

**Side Swiper complete**

**A201** - The Side Swiper has consistently been one of our top tools. A super stiff tool for automotive tint installation. The Side Swiper is great for hard to reach back window installations.

**Conquistador**

**A202** - Great technology gives us this superior Conquistador. New stiffer body and featured in a high visibility color so you won't leave your favorite tool in a car. 6.5" rubber edge is molded to the body (not glued) and will not peel away. A true must have for any serious tinter.

**Yellow Tail Fin**

**A203** - The Yellow Tail Fin is great tool for getting behind hard to reach 3rd brake lights. Negative curve to keep constant pressure on the film.

**Yellow Contour**

**A204** - The Yellow Contour is very versatile tool for reaching out of the way places. One of our most popular tools since we brought it out 3 years ago.

**Gold EZ Reach Corner Tool**

**A205** - The Gold EZ Reach Corner Tool now offers a pre-cut 6" Gold Teflon to reach all of those corners. The Gold EZ Reach Corner Tool also makes sliding film into the door gaskets a breeze

**Gold EZ Reach Ultra Corner Tool**

**A205U** - The Gold EZ Reach Ultra Corner Tool now offers a pre-cut 6" Gold Teflon to reach all of those corners. The Gold EZ Reach Ultra Corner Tool also makes sliding film into the door gaskets a breeze.

**Flat Glass Bull Dozer**

**A208** - The Flat Glass Bull Dozer is like the Automotive Bull Dozer, this unit helps you reach hard to reach areas on a flat glass install. Longer ribs on the Flat Glass Bull Dozer increase the stiffness. The soft rubber tip on the end insures you won't end up with any scratches on the film.

**Green Tail Fin**

**A209** - The Green Tail Fin is designed to help with those problematic third brake lights and other tight spots. The Green Tail Fin is also great for paint protection installs.

**Green Contour**

**A210** - The Green Contour is a softer version of the popular Yellow Contour. The Green Contour is great for paint protection installs.

**Yellow Quick Foot**

**A212** - The Yellow Quick Foot will help you reach the hard to reach places that drive you crazy. Use the edge of the handle like a Chizler to clean those problem decals off with ease. The Yellow Quick Foot is sure to make your installs easier.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

**Blue Quick Foot**

**A212BL** – The Blue Quick Foot will help you reach the hard to reach places that drive you crazy. Use the edge of the handle like a Chizler to clean those problem decals off with ease. The Blue Quick Foot is sure to make your installs easier.

**White Quick Foot**

**A212W** – The White Quick Foot will help you reach the hard to reach places that drive you crazy. Use the edge of the handle like a Chizler to clean those problem decals off with ease. The White Quick Foot is sure to make your installs easier.

**Platinum EZ Reach Corner Tool**

**A214** – The redesigned Platinum EZ Reach is a 1/4 millimeter thicker and slightly more rigid than the original Platinum version. As before, the unique design of the EZ Reach provides installers access to difficult installation areas. Try it for yourself, and see why most installers prefer the Platinum EZ Reach over the Gold EZ Reach.

**Lime EZ Reach Corner Tool**

**A214L** – The new EZ Wing Squeegee Reach Tool offers all of the benefits of a traditional triangle squeegee tool, but offers some new features as well that you will love.

**Platinum EZ Reach Ultra Corner Tool**

**A214U** – The Platinum EZ Reach Ultra Corner Tool is a new harder version of the popular Gold Easy Reach Ultra Corner Tool. You need to try it for yourself...many tint installers prefer the Platinum to the Gold!

**The Stroke Doctor**

**A215** – The Stroke Doctor is engineered to make difficult to reach installations much easier to master.

**White Quick Fix**

**A217** – The White Quick Fix is a cross between a Bondo and a Diamond Tip. The two ribs across the middle make the card easier to grip, enabling installers to force out more water.

**Platinum Contour**

**A219** – The Platinum Contour gives you the same great installation benefits as the Yellow Contour only its stiffer allowing you to push more water out. The unique tear drop shape allows you to get into those hard to reach corners

**3 1/2" Yellow Turbo**

**A2203** – The Yellow Turbo is great for installing automotive window tint, paint protection films and vinyl applications

**3 1/2" Green Turbo**

**A2203G** – The Green Turbo is a relatively softer durometer turbo which is great for installing paint protection films and vinyl applications. The Green Turbo has the consistency of the Yellow Turbo but the flexibility of the Black Smoothee.

**3 1/2" Orange Turbo**

**A2203OR** – The Orange Turbo is great for installing automotive window tint, paint protection films and vinyl applications.

**4" Black Smoothee**

**A2204** – The 4" Black Smoothee blade is a great initial prep tool for cleaning your glass before the install. This tool also does a fine job on those paint protection installation projects that you have.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

5 1/2" Yellow Turbo

**A2205** - The Yellow Turbo is great for installing automotive window tint, paint protection films and vinyl applications

5 1/2" Basic Yellow Turbo

**A2205B** - The Yellow Turbo is great for installing automotive window tint, paint protection films and vinyl applications

5 1/2 Green Turbo

**A2205G** - The Green Turbo is a relatively softer durometer turbo which is great for installing paint protection films and vinyl applications. The Green Turbo has the consistency of the Yellow Turbo but the flexibility of the Black Smoothee.

5 1/2" Orange Turbo

**A2205OR** - The Orange Turbo is great for installing automotive window tint, paint protection films and vinyl applications.

9" Black Smoothee

**A2209** - The 9" Black Smoothee blade is a great initial prep tool for cleaning your glass before the install. This tool also does a fine job on those paint protection installation projects that you have.

Titan Tool Red

**A220R** - This new version provides you a longer stiffer alternative to the Conquistador. With a blade length of 14 3/4 inches overall, the Red Titan Tool allows you to get into those hard to reach back window decks. With increased strength at the tip of the tool you can push out more water than with the old design

Gator Blade I

**A221** - GATOR BLADE 1 features arched blades on opposite ends. This blade design allows more scraping pressure for around rear defrosters and for adhesive removal on surfaces where metallic razor blades would scratch surfaces, such as stainless steel and painted surfaces.

18 1/2" Basic Yellow Turbo

**A2218B** - The Yellow Turbo is great for installing automotive window tint, paint protection films and vinyl applications

18 1/2" Orange Turbo

**A2218OR** - The Orange Turbo is great for installing automotive window tint, paint protection films and vinyl applications.

Gator Blade II

**A222** - Features three functional edges. The first 3.5 linear edge is great for lifting bottom roll up gaskets while neatly tucking the film safely beneath to reduce peeling. A long slender acute point reaches into tight corners of quarter or port windows and behind front & rear gaskets of roll-downs and also functions well for lifting & tucking. The three edges of the Gator Blade II offer a variety of radius corners for pressing in specs under the film.

18 1/2" Red Baron Turbo

**A2220R** - The 20" Red baron turbo is Red in color, just thought you should know in case you were thinking this was purple or something. It is also the hardest turbo that we carry.

Paddle

**A224** - The "Paddle" boasts a 3" wide beveled blade with 13 1/2" of reach for those tough rear window installs. Made from a durable hard plastic that is still slightly flexible for maximum water removal.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

Power Squeegee (w/o angle)

6" - A2251-6    8" - A2251-8

The 6" Power Squeegee without angle easily accommodates handle extensions for fast, safe film installations.

4" 3M Blue Bondo

**A2300B** - 4 inch Blue Bondo can be used as an installation squeegee or wrap it in a soft towel to bump edges dry. Useful for either window film or paint protection film. Harder than the Gray Bondo A2300GR

6" Lidco Felt Edge Bondo

**A2300F6** - 6" Lidco Felt Edge Bondo is great for paint protection film installations. Felt edge is much less apt to scratch the film during installation.

6" Lidco Gray Bondo

**A2300GR6** - Some people think 6 inches is better than 4 inches...The 6" Lidco Gray Bondo can be used as an installation squeegee or wrap it in a soft towel to bump edges dry. Useful for either window film or paint protection film. Slightly harder than the white and the orange bondos.

4" Magnetic Black Bondo

**A2300MAG** - The Magnetic Bondo is great for vinyl applications. It looks like a regular black bondo card... but it has a set of strong magnets inside. This tool is designed to not only be used to smooth out the vinyl, but to actually hold the vinyl in place while you are positioning it.

Bondo Felt Sleeve

4" - A2300S    6" - A2300S6

Have the benefits of a felt edge with any 4" bondo squeegee. This sleeve slides right over your existing bondo cards. Great for paint protection film installations. Felt edge is much less apt to scratch the film during installation.

4" Blue Teflon Card

**A2300TB** - The BLUE TEFLON HARD CARD is the softest of the "Teflon Group". This extremely flexible card is ideal for laying down the Dot-Matrix area when Matrix Magic (M2739) is used. Allows the user to gently purge the glue out without removing too much.

6" Yellow Teflon Card

**A2300TY-6** - It is softer...but it is still big. The same properties of the yellow teflon hard card with an extra 2" of edge.

4" Gold Teflon Card

**A2300TG** - Many window film installers say that this extremely popular hard card provides more friction on film for better gripping during the heat forming process. It is on the high end of "medium" on our flexibility scale, which makes it fantastic for water extraction during squeegeeing or bumping film dry.

4" Merlot Teflon Card

**A2300TM** - The Merlot (better known as Purple) Teflon Hard Card is a mix of stiffness and flexibility. This card is rapidly becoming very popular with installers.

White Teflon Card

4" - A2300TW    6" - A2300TW-6

The WHITE TEFLON CARD is probably the most popular hard card in the industry. This card is just slightly stiffer than the Gold Teflon Card.

4" Universal Bondo

**A2300U** - The 4" Universal White Bondo can be used as an installation squeegee or wrap it in a soft towel to bump edges dry. Useful for either window film or paint protection film.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

4" Lidco Orange Bondo (Square Corners)

**A2300YS** – The 4" Square Corner Lidco Orange Bondo can be used as an installation squeegee or wrap it in a soft towel to bump edges dry. Useful for either window film or paint protection film. This bondo has square corners unlike the traditional 4" Lidco Orange Bondo.

The Chizler

**A2302L** – The Chizler is bigger and harder than the Lil' Chizler. This is the stiffest of all of the Chizlers and works great in removing decals and working with window film fingers.

The Pink Chizler

**A2302P** – The Pink Chizler falls into the middle of stiffness and durometer of the Chizler lines. Similar to the Lil Chizler in hardness and flexibility, the Pink Chizler is just slightly larger.

The Yellow Chizler

**A2302Y** – The Yellow Chizler is the softest of the Chizlers and is great for paint protection installs.

Chisel

**A2303CH** – This new tool has an wide installation tip for reaching behind gaskets while keeping your hands out of the way. The "Chisel" is 6 1/2" in overall length with approximately 3" of flexible blade. Made of lightweight yet unbelievably durable plastic. Great for tucking film behind tight door gaskets.

Mother Tucker

**A2303MT** – The "Mother Tucker" is a great new tucking tool with a 6" handle and a 6"x 1 3/4" usable blade. This tool is great for tucking film behind door gaskets, or for getting into those tight fitting, long reach areas. Chemical resistant, flexible, and an overall length of 12 inches of virtually unbreakable nylon material, you really can't beat this Mother Tucker.

Shank

**A2303S** – This "Shank" may at first glance resemble an ordinary plastic knife, but it is definitely a tough, useful tucking tool. This new tool has an offset installation tip for reaching behind gaskets while keeping your hands out of the way. It is 7" in overall length with approximately 3" of flexible blade. Made of lightweight, yet extremely durable plastic, it is great for tucking film behind those tight door gaskets.

Lidco EZ Grip

4" - A2304EZ 6" - A2306EZ

Save the fatigue on your hands. The 4" Lidco EZ Grip gives you something more substantial to grab onto. Works with any 4" bondo card. Just slide it onto the card to create a much better grip.

12" White w/Black Edge Squeegee

**A2306L** – The 12" White w/ Black Edge has just the right length to get behind those third brake lights. Cut it down to size to fit any of your installation needs. Is it white with a black edge or is it a black stripe on white, only you can decide.

9 1/2" Red Devil

**A2307** – The 9 1/2" Red Devil is very thin so it will help you to get behind those real tight third brake lights when nothing else will.

Yellow Shuttle

**A2308Y** – The YELLOW SHUTTLE is a great tool to get behind tight window gaskets or those pesky third break lights. With just the right length at 10" overall and a decent amount of flex this tool works so well you will think it was designed by the folks at NASA.

White Diamond Tip

**A2309W** – The White Diamond Tip card is the hardest of the "Diamond Tips". The corners have a 20-degree angle which makes it great for tight corners.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

Yellow Diamond Tip

**A2309Y** - The Yellow Diamond Tip card is the second hardest of the "Diamond Tips". The corners have a 20 degree angle which makes it great for tight corners.

Speed Wing-Lime

4" - A2311-4 6" - A2311-6 8" - A2311-8

"Wings" allow installers to reach tight areas typically out of the reach of most bump, bondo, teflon and hard cards. Features one flat edge and one curved edge. Curved edge is designed with proprietary Control Contour Technology (CCT) encouraging a finger or bubble to disperse outward which reduces the chances of a crease.

Smart Card Platinum

**A2315** - Smart Cardz are a contemporary version of the traditional hard card...but better, because they are 25% wider and have a comfortable grip and thin edge.

Smart Card Mango

**A2315M** - Smart Cardz are a contemporary version of the traditional hard card...but better, because they are 25% wider and have a comfortable grip and thin edge.

API Square Corner Blue Hard Card

**A2350STB** - The API cards have a texture that is slightly easier to grip with wet, soapy hands and are now available in a new design which incorporates one squared corner.

API Square Corner Black Hard Card

**A2350STBK** - The API cards have a texture that is slightly easier to grip with wet, soapy hands and are now available in a new design which incorporates one squared corner.

API Square Corner Gold Hard Card

**A2350STG** - The API cards have a texture that is slightly easier to grip with wet, soapy hands and are now available in a new design which incorporates one squared corner.

API Square Corner Pink Hard Card

**A2350STPK** - The API cards have a texture that is slightly easier to grip with wet, soapy hands and are now available in a new design which incorporates one squared corner.

API Square Corner Red Hard Card

**A2350STR** - The API cards have a texture that is slightly easier to grip with wet, soapy hands and are now available in a new design which incorporates one squared corner.

API Square Corner White Hard Card

**A2350STW** - The API cards have a texture that is slightly easier to grip with wet, soapy hands and are now available in a new design which incorporates one squared corner.

API Round Corner Blue Hard Card

**A2350TB** - The API cards are very similar to our other brands of hard cards, but they have a texture that is slightly easier to grip with wet, soapy hands.

API Round Corner Black Hard Card

**A2350TBK** - The API cards are very similar to our other brands of hard cards, but they have a texture that is slightly easier to grip with wet, soapy hands.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

**AP1 Round Corner Gold Hard Card**

**A2350TG** – The AP1 cards are very similar to our other brands of hard cards, but they have a texture that is slightly easier to grip with wet, soapy hands.

**AP1 Round Corner Pink Hard Card**

**A2350TPK** – The AP1 cards are very similar to our other brands of hard cards, but they have a texture that is slightly easier to grip with wet, soapy hands.

**AP1 Round Corner Silver Hard Card**

**A2350TS** – The AP1 cards are very similar to our other brands of hard cards, but they have a texture that is slightly easier to grip with wet, soapy hands.

**AP1 Round Corner White Hard Card**

**A2350TW** – The AP1 cards are very similar to our other brands of hard cards, but they have a texture that is slightly easier to grip with wet, soapy hands.

**AP1 Round Corner Yellow Hard Card**

**A2350TY** – The AP1 cards are very similar to our other brands of hard cards, but they have a texture that is slightly easier to grip with wet, soapy hands.

**White 5-Way Tool**

**A2400** – The White 5-Way Tool is a cheap, but great trim guide. It is also a handy “Bump Tool” for bumping or drying the edges of your flat glass film. Not as hard as the Black 5- Way, but it seems to be every bit as popular.

**The Edge**

**A2400E** – Think of THE EDGE as a cheaper plastic version of the Gasket Wizard or a ergonomic trim guide. It really works great for both.

**Slim Foot**

**A2401** – The Slim Foot is Big Foots thinner but stiffer cousin. Narrower design at the neck to fit in tight spots.

**Red Devil Smoother**

**A2403** – The Red Devil Smoother is a thin, 8.5” wide tool that works well behind third brake lights and assists in pulling gaskets back to allow you to slide your film behind them.

**Big Foot**

**A2404** – The Big Foot is 15 overall length for those hard-to-reach back window installations. Soft rubber handle fits the hand well and provides non-slip grip

**Blue Little Foot**

**A2405B** – The Blue Little Foot is the softest of the line in flexibility and hardness of all the little foots. The 6” pointed blade is perfect to get into those hard to reach spots.

**Black Little Foot**

**A2405BK** – The Black Little Foot is the stiffest of the line in flexibility and hardness of all the Little Foots. The 6” pointed blade is perfect to get into those hard to reach spots. If this one is a little too stiff for you there are two other options to fill your tinting needs

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

**Red Little Foot**

**A2405R** – The Red Little Foot is the middle of the line in flexibility and hardness of all the Little Feet. The 6" pointed blade is perfect to get into those hard to reach spots. If this one is a little too soft or too stiff there are two other options to fill your tinting needs. MADE IN THE USA

**Red Speed Wing**

**4" – A2411-4 6" – A2411-6 8" – A2411-8**  
 "Wings" allow installers to reach tight areas typically out of the reach of most bump, bondo, teflon and hard cards. Features one flat edge and one curved edge. Curved edge is designed with proprietary Control Contour Technology (CCT) encouraging a finger or bubble to disperse outward which reduces the chances of a crease

**Yellow Speed Wing**

**4" – A2511-4 6" – A2511-6 8" – A2511-8**  
 "Wings" allow installers to reach tight areas typically out of the reach of most bump, bondo, teflon and hard cards. Features one flat edge and one curved edge. Curved edge is designed with proprietary Control Contour Technology (CCT) encouraging a finger or bubble to disperse outward which reduces the chances of a crease

**Hard Card Sharpening Tool**

**A2805** – Use the Hard Card Sharpening Tool to clean the rough edges and nicks that your hard cards develop over time. The Hard Card Sharpening Tool will give your hard cards a longer life.

**Blue Maxx Insert**

**6" – B195-6 8" – B195-8  
 10" – B195-10 12" – B195-12**  
 Blue Maxx blade, slide it into a channel and install until your hearts content!

**120" Blue Max Roll**

**B195-120** – Just what you always wanted 10 feet of Blue Maxx! Change yours often for best results. Use in your SideSwiper, StrokeDoctor and Unger Pro Channels.

**4" Black Smoothee**

**B204** – The 4" Black Smoothee blade is a great initial prep tool for cleaning your glass before the install. This tool also does a fine job on those paint protection installation projects that you have.

**28" Black Smoothee w/o Handle**

**B228** – Whether you are using it for the initial prep work of cleaning the windows or using it as a installation squeegee the 28" Black Smoothee blade will get the job done. Cut the blade down to size to fit all of your installation needs. The Black Smoothee is the softest Turbo that we carry. Some think that it is too soft for installing window film, but it is great for installing paint protection film.

**5" X 2" Blue Mas (Beveled Blade)**

**B3701** – The Blue Max Squeegee Blade is a popular choice for maximum water removal from your automotive or flat glass installations.

**5" X 2" Cropped Blue Max (Beveled Blade)**

**B3701C** – The Cropped Blue Max Squeegee Blade is a popular choice for maximum water removal from automotive or flat glass installations.

**Blue Maxx Blade (No Bevel)**

**B3701N** – Same Great Blue Max, but without the beveled edge. This design provides longer squeegee life because you can flip the blade over, so you always have a smooth, un-nicked leading edge.

**5" X 1 3/8" Blue Max Blade (No Bevel)**

**B3701SN** – BLUE MAX BLADE 5" x 1 3/8" Designed to remove more water on your thickest security film jobs. This non-beveled design provides longer squeegee life because you can flip the blade over, so you always have a smooth, un-nicked leading edge.

# XPEL WINDOW FILM INSTALL TOOLS

## SQUEEGEES & ACCESSORIES

### Clear Max (Beveled Blade)

**B3702** – Cousin of the popular Blue Max, the Clear Max Squeegee Blade is a slightly softer version

### Orange Crush

**5" – B3705    8" – B3708**

The 5" (5" X 2") and 8" (8" X 2") Orange Crush Blade is a 93 Durometer squeegee blade with a beveled leading edge that works great for automotive installations as well as flat glass or safety film installs.

### 5" Orange Crush Cropped

**B3705C** – The Cropped Orange Crush Squeegee Blade is a popular choice for maximum water removal from your automotive or flat glass installations.

# XPEL WINDOW FILM INSTALL TOOLS

## SCRAPERS

Clip Scraper

**A1475** - The Clip Scraper offers readily accessible precision and leverage.

Door Upholstery Remover

**A1477** - Place the Door Upholstery Remover tool under edge of the door upholstery panel, insert into the fastener as far as possible and simply pry up. Large, comfortable handle.

4" Short Handle Scraper

**A1500** - The 4" Short Handle Scraper is actually one of our longer scrapers. Utilizing a 9.25" handle, it has a total length of 12". Uses B128 10pk or B128A scraper blades.

4" red scraper with handle

**A1502** - The 4" Red Scraper boasts a 9" handle and a 12" overall length. Equipped with an easy to use Twist Lock design for rapid blade changes. No more scrambling for a screwdriver when changing a blade.

Retractable Razor Scraper

**A1503** - Retractable Razor Blade Scraper.

Retractable Razor Blade Scraper

**A1503AW** - Retractable Razor Blade Scraper. Safely holds your 1" razor blades.

# XPEL WINDOW FILM INSTALL TOOLS

## LIQUIDS

### Gallon Performax Installation Gel

**M1130** – Performax Gel is a premixed Paint Protection installation aid for professional paint protection installers. Simply pour into a standard spray bottle and apply a generous amount to the working surface. Performax Gel does not need to be diluted, but can be, depending upon the amount of slip vs grip that your installation demands! This product is great when installing a large piece like a whole hood.

### 1Qt Dirt-Off Concentrate

**M1133** – Dirt Off is a concentrated cleaning solution which is used instead of soapy water to clean the glass before film application. Dirt Off can also be used as a mounting solution for CDF and other dry adhesive films (excluding bronze & Low-E).

### Tint Slime Gallon

**M1134** – TintSlime is the ultimate slip solution for window film installations.

### Film-On Concentrate (1 Qt)

**M1135** – Film-On is a concentrated pure mounting solution designed specifically for window film. Film-On will provide cleaner installs with less chance of fingering occurring. Film-On will not degrade pressure sensitive adhesives like dish detergent can.

### 1 Gallon X-100

**M2715** – X-100 is a concentrated slip agent or mounting solution for CDF and other dry adhesive films (excluding bronze & Low-E). X-100 is a concentrated cleaning solution which is used instead of soapy water to clean the glass before film application.

### ATR Adhesive Remover

**M2727** – ATR ADHESIVE SOLUTION is a super action adhesive remover that is the most powerful in its class! Dissolves adhesive on contact.

### 1 Gallon Rapid Remover

**M2734** – Rapid Remover is a fast acting adhesive remover that works in 60 seconds and requires very little scraping.

### 30 oz. Rapid Clear

**M2737** – Rapid Clear is a silicone polish safe for window film and leaves it looking brand new.

### 32 oz. Rapid Remover

**M2738** – Rapid Remover is a fast acting adhesive remover that works in 60 seconds and requires very little scraping.

### Performax Glass Cleaner

**M2748** – Performax Glass Cleaner is an ammonia-free foaming glass cleaner for shop use or retail. Specifically formulated to be safe for cleaning window films. This a great product for add on "Point-of Purchase" sales.

### 1 Gallon Silicone Polish

**M2750** – Silicone polish is a great final cleaning product, use it before your customer shows up to give the windows that extra sparkle your customers will love. The Silicone polish is safe for use with all window films.

### Tint Off

**M2751** – Tint Off works well for removing the window film and adhesive all at the same time. Reduce the amount of work needed to remove the window film and adhesive.

# XPEL WINDOW FILM INSTALL TOOLS

## LIQUIDS

### Tint Off - 1 Gallon

**M2751-G** - "Tint Off" works surprisingly well for removing the window film and adhesive all at the same time. Reduce the amount of work needed to remove window film and adhesive. Strong, effective product---yet the non-toxic, biodegradable formula is safe for use in your customer's cars and on installer's bodies.

### Slip Up Concentrate

**M2756** - Why do they call it Slip Up? Not everyone slips up a lot of times they slip down or sideways, they could have called it Slip Any Direction. This solution helps a film installer correct small slips.

# XPEL RINSE FREE CAR WASH SYSTEM

## SOLUTION & WASH BUCKETS

Flawless Finish Rinse Free Car Wash (2oz)

**R1329-2** – XPEL Flawless Finish Rinse Free Car Wash is composed of a unique formulation that encapsulates the dirt with a lubricating polymer preventing scratches or harm to the paint. Mix 1 oz with a gallon of water and you have a fast, safe and effective way to clean your car anytime, anywhere with no mess.

Flawless Finish Rinse Free Car Wash (16oz)

**R1329** – XPEL Flawless Finish Rinse Free Car Wash is composed of a unique formulation that encapsulates the dirt with a lubricating polymer preventing scratches or harm to the paint. Mix 1 oz with a gallon of water and you have a fast, safe and effective way to clean your car anytime, anywhere with no mess.

Flawless Finish Rinse Free Car Wash (1 Gal)

**R1329-128** – XPEL Flawless Finish Rinse Free Car Wash is composed of a unique formulation that encapsulates the dirt with a lubricating polymer preventing scratches or harm to the paint. Mix 1 oz with a gallon of water and you have a fast, safe and effective way to clean your car anytime, anywhere with no mess.

XPEL 5 Gallon Wash Bucket w/ Grit Guard (Lid not included)

**R1342** – XPEL 5 gallon Grit Shield wash bucket extracts the dirt from your wash mitt and traps it beneath a protective grille. This prevents dirt from being picked up and rubbed back onto the paint.

XPEL 5 Gallon Wash Bucket & Installation Stool

**R1339** – XPEL 5 gallon Grit Shield wash bucket extracts the dirt from your wash mitt and traps it beneath a protective grille. This prevents dirt from being picked up and rubbed back onto the paint. Add to that the utility of its heavy-duty casters and air tight seal, and you have the perfect mobile wash system that can be used anytime anywhere and in any weather.

# XPEL PLOTTERS & ACCESSORIES

## GRAPHTEC PLOTTERS & ACCESSORIES

### Wide Western Graphtec Plotter

24" - FC8600-60    54" - FC8600-130  
 30" - FC8600-75    64" - FC8600-160  
 42" - FC8600-100

The FC8000 series high-performance cutting plotter is an industry leader for sign makers, graphic artists, automotive aftermarket professionals, countertop installers and other related users.

### FC Series Replacement Cutting Mat Tape

Model FC8600-60 - 51407-141  
 Model FC8600-75 - 51407-142  
 Model FC8600-100 - 51407-143  
 Model FC8600-130 - 51407-144  
 Model FC8600-160 - 51407-145

Replacement cutting strip for the Plotter. When these strips get worn, the plotter can sometimes cut at inconsistent depths. A fresh strip is especially important when cutting window tint where the tolerances are so small.

### 45 Degree Blade for Graphtec Plotters

0.9mm - PBG09-45    1.5mm - PBG15-45  
 45 Deg Replacement Blade for Graphtec Plotters

### 0.9 MM Blue Tip Blade Holder

PHP32-CB09N - Black tip blade holder with blue top for use with the Graphtec FC Series plotter. This holder is the same as the one that comes with the plotter and is for use with 0.9mm blades when cutting paint protection film.

### 1.5 MM Red Tip Blade Holder

PHP33-CB15N - Black tip blade holder with red top for use with the Graphtec FC Series plotter. This holder is for use with 1.5mm blades when cutting paint protection film.
